The Seven-passenger Limousine (Custom Built)

CLOSED CAR COMFORT WITH OPEN CAR ACTIVITY

THE Twin-Six Motor seems always to have something in reserve. Twelve overlapping power impulses leave no opening for the drag of a heavy load to pull against an unsupported flywheel. What drag there is comes always against the pull of the motor itself.

It follows that the greater weight of the enclosed body is less felt by the Twin-Six than by any type of motor with less frequent power impulses.

It also follows that Packard enclosed cars are in great and growing demand among motorists who want dust and weather protection the year around.

Our assortment of enclosed types is very comprehensive but the range of selection is constantly narrowing as one type after another is sold out.
